

BRAND DESIGN KIT

Kramaniti

Current Website Edition

A square-first visual system for clarity, connection, and practical AI.

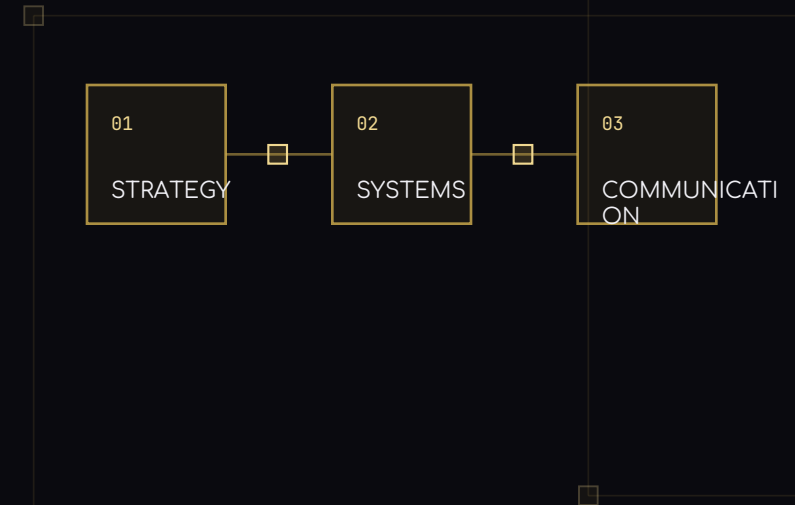

SQUARE SIGNAL EDITION / AUGUST 2026

Logic made visible.

The identity does not decorate the system. It reveals how the system connects.

Kramaniti joins **strategy**, **systems**, and **communication** into one coherent operating pipeline. The visual language should behave the same way: deliberate paths, clear handoffs, and a restrained signal at the point of connection.

Quietly technical. Business-first. Premium through restraint.

What this edition governs

A practical bridge between the foundational Brand Book and the evolved public interface.

OBSERVED

Exact colours, typefaces, button geometry, hero signals, floating navigation, and reveal behaviour currently implemented in the website.

FOUNDER DIRECTION

Square connectors replace circular and orbital supporting motifs in all new work. The official mark remains unchanged.

MIGRATION

Hero and navigation are the reference implementation. Remaining circular motifs elsewhere are legacy patterns to revise when those surfaces are next touched.

UNKNOWN

Formal print production values, alternate wordmark construction, and final approval cadence require founder approval.

The mark is the signature

Preserve the supplied gold mark. The square-first rule applies to the supporting system—not to a redraw of the identity.

PRIMARY / GOLD ON OBSIDIAN

■ Use with confidence

Gold mark on Obsidian or Graphite. Maintain generous negative space. Let the mark appear once per surface.

OBSERVED + DIRECTION

■ Protect the asset

Do not stretch, recolour, outline, rotate, crop, add effects, or rebuild the mark from geometric primitives.

DO NOT

Clear space, anchored by x

The foundational book establishes 0.25x clear space. Use a square field to make the rule operational.

0.25x

Keep the mark optically centred inside its field. Do not force the surrounding composition to mimic the mark's internal form.

OBSERVED

0.25x minimum clear space

UNKNOWN

Formal wordmark construction and print-master specifications

Comfortaa carries the voice

Rounded humanism, disciplined by sharp geometry and mono annotations.

JETBRAINS MONO / MICRO LABELS / DATA / STATES

SYSTEM / SIGNAL / HUMAN REVIEW / 03:24

■ One useful contrast

Use mono sparingly. It labels the system; it does not narrate it.

A decisive digital hierarchy

Scale with the viewport. Keep line lengths calm and weights restrained.

HERO

Clarity before acceleration.

56-78 PX / .99 LH / -.052EM

H1

Build the system that earns scale.

42-64 PX / 1.02 LH / -.04EM

H2

From question to workflow.

32-48 PX / 1.08 LH / -.03EM

BODY

Readable, deliberate, and business-first.

15-17 PX / 1.70 LH / NORMAL

MICRO

OBSERVED / SYSTEM STATE

8-11 PX / 1.35 LH / .08EM

Dark-first. Gold-led.

The palette creates authority through contrast, not volume.

Obsidian	Graphite	Charcoal	Burnished Gold
#0A0A0F	#141418	#1E1E24	#C9A84C
Ice White	Silver Mist	Slate Grey	Smoke
#F0F0F5	#9B9BA8	#6B6B78	#2A2A32

Let gold behave like a signal

Most of the surface stays quiet. Gold appears at decisions, handoffs, emphasis, and focus.

FIELD

60%

The 60/18/12/7/1 split is a compositional recommendation—not an automated token requirement. Use it as a restraint check, especially on presentation and campaign surfaces.

DEPTH	TYPE	SIGNAL
18%	12%	7%

 SUCCESS

 WARNING

 ERROR

 INFO

Square is the point of connection

A modular field replaces the orbit. Relationship is expressed through adjacency, path, and handoff.

NODE

CONNECTOR

GATE

CLUSTER

FOUNDER DIRECTION

No circles, orbital rings, radial node maps, circular masks, or decorative dot fields in new visual-system work.
Rounded 8 px interface corners remain valid for ergonomic controls and containers.

A vocabulary, not a pattern pack

Each asset communicates a system state. Use only when it clarifies structure.

01 / ORIGIN

02 / HANDOFF

03 / DECISION

04 / HUMAN REVIEW

05 / PARALLEL WORK

06 / RESOLVED

Routes persist. Signals travel.

The line is infrastructure. The bright segment is activity. The square is the moment of handoff.

BASE RAIL / 30% GOLD

ACTIVE SIGNAL / 1.6 PX / VARIED 5.5-7.4 S

CONNECTOR / 7 × 7 PX / BRIGHTEN ON PASS

Motion confirms relationship

No ambient spectacle. Animation exists to reveal hierarchy, direction, or state.

Word reveal

Opacity 0 → 1 Translate Y 18 px → 0 Blur 16 px → 0
0 720 ms / 55 ms stagger

OBSERVED

Signal route

Continuous base rail 1.6 px active segment
5.5–7.4 s varied cycles Negative delays prevent
lockstep

OBSERVED

Square handoff

Scale 1 → 1.72 at arrival Brighten to pale gold
Synchronise to passing signal Never pulse without a
cause

OBSERVED + DIRECTION

REDUCED MOTION

Show all copy immediately. Hide moving routes and connector illumination. Preserve layout, contrast, and meaning without animation.

CLARITY

SYSTEMS

Atmospheric words are spatial anchors, not headlines.

Use one word, low contrast, clipped by a square edge or orthogonal rail. Never compromise reading order.

One geometry. Clear priority.

All public actions share an 8 px radius, visible focus, and a composed 50 px height.

HEIGHT	RADIUS	PADDING
50 PX	8 PX	20 PX
TYPE	FOCUS	
14 PX	2 PX / 4-5 PX OFFSET	

A floating instrument, not a toolbar

The shell frames orientation and one decisive action. Its shine follows the same 8 px geometry.

KRAMANITI

Method

Work

Insights

Book an audit 

Desktop shell

Max width 1120 px Height 52 px Radius 8 px
Shine radius 12 px

Mobile trigger

44 × 44 px tap target No box around icon
Three menu links stay text-led

Mobile action

Only the audit CTA adopts the standard
button system inside the menu. 

Contain only what needs containing

The site should feel open and editorial. Glass is reserved for functional instruments.

Open composition

Narrative sections use typography, whitespace, rails, and alignment—without automatic card borders.

DEFAULT FOR STORYTELLING

Functional glass

Use for navigation, controls, workflow states, and bounded interactive tools.

EARN THE CONTAINER

Open line. Square logic.

Icons should clarify navigation and state without becoming a second illustration system.

CONNECT

FRAME

TRANSFER

PROGRESS

- 1.35-1.5 px stroke

- Butt or square terminals

- 24 px and 32 px base sizes

- No emoji in public UI

- No mixed icon families

- No circular icon containers

A grid you can feel

Use a 12-column desktop field, a 4-column mobile field, and an 8 px spacing rhythm.

DESKTOP / 12 COLUMNS / 8 PX RHYTHM

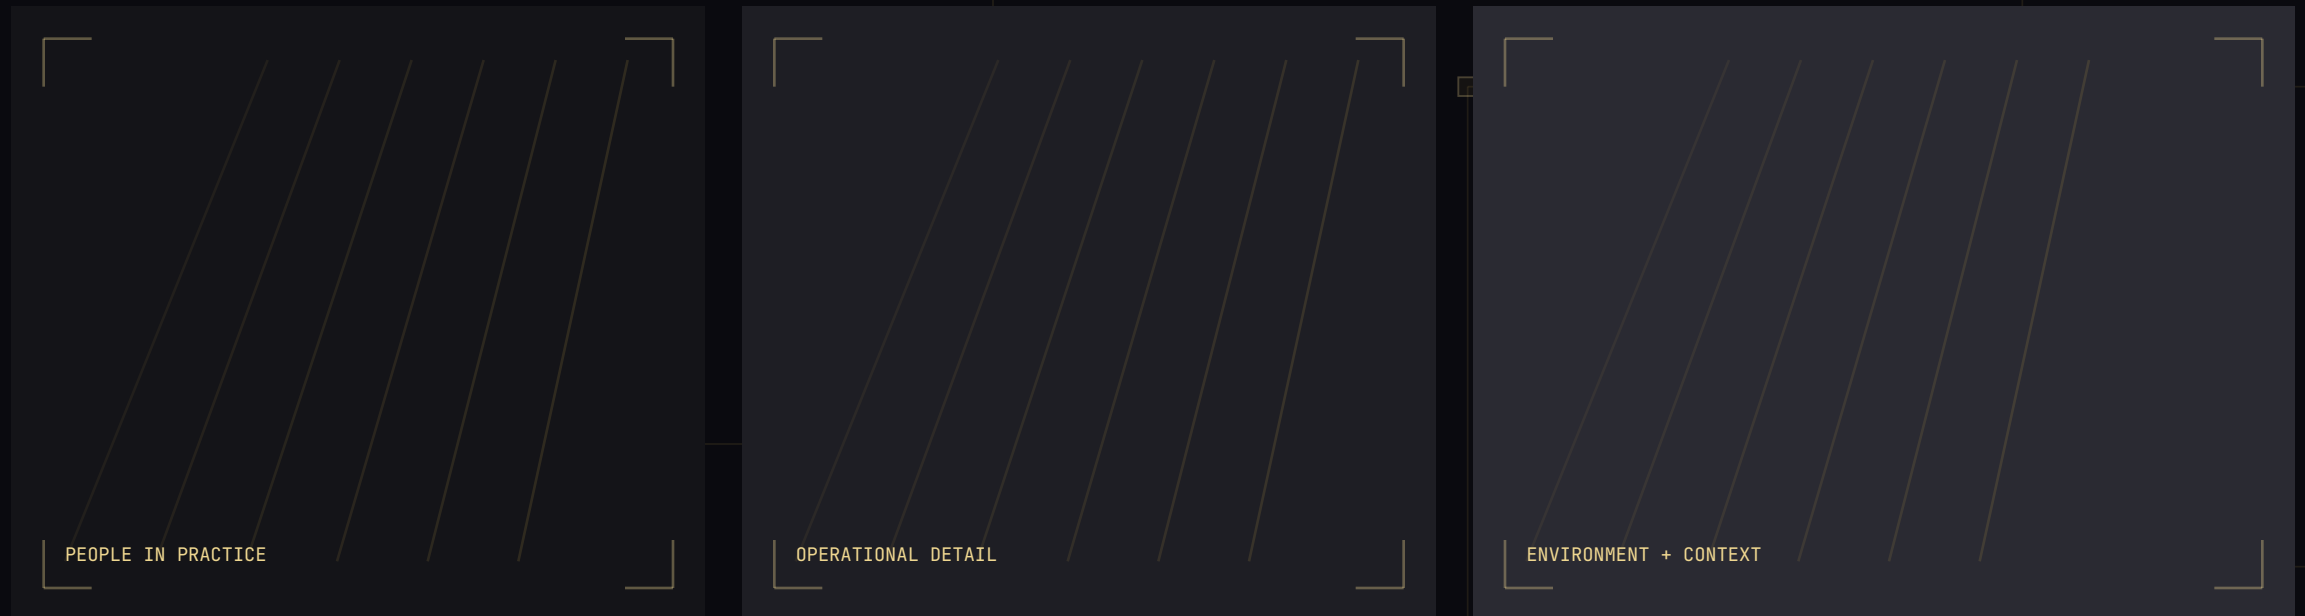

MOBILE / 4

Align important words, nodes, and image edges to the field. Break the grid only to reveal a relationship—not to manufacture novelty.

Human reality, structured with intent

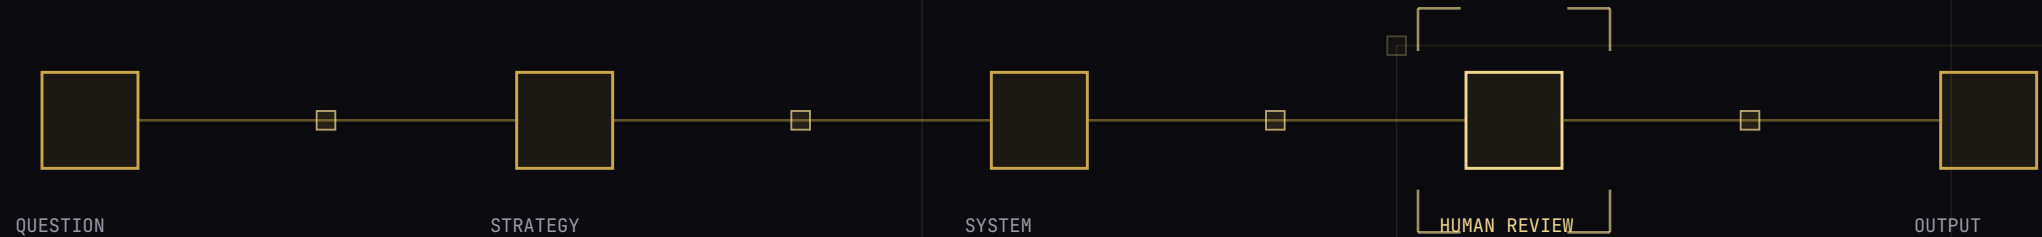

Photography should show decisions, work, and consequence—not generic technological awe.

Prefer square or editorial crops, restrained colour, real environments, and directional light. Avoid circular masks, synthetic holograms, robot clichés, and anonymous handshake imagery.

Make the operating logic legible

Every diagram should answer: what moves, where it changes, and where a person decides.

DIRECT LABELS

Name states and decisions on the diagram.

NO DECORATIVE METRICS

Use numbers only when the source and meaning are clear.

SHOW REVIEW

Consequential actions visibly pause for human judgment.

01 BRAND SIGNATURE

KRAMANITI

02 WORD-BY-WORD REVEAL

Clarity before acceleration.

04 CONTINUOUS RAIL

We design practical AI systems that connect strategy, workflows, and communication—without losing human judgment.

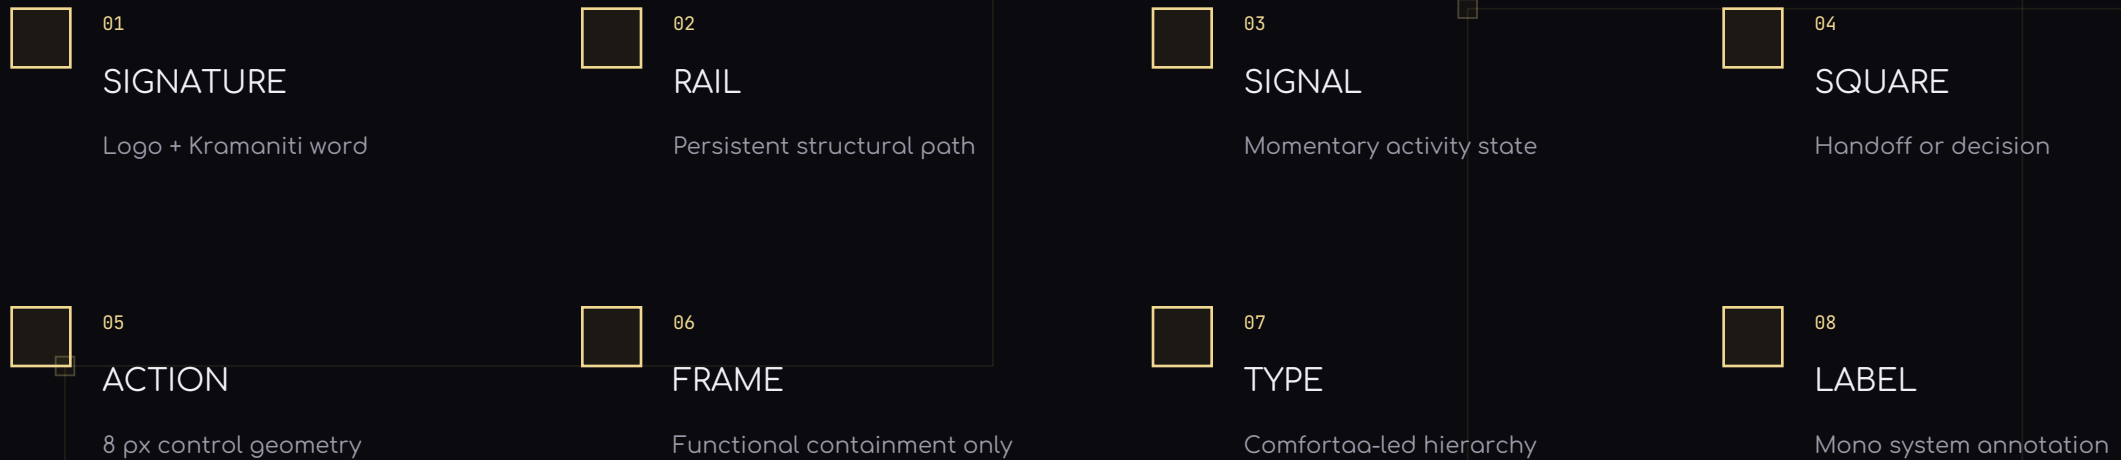

03 UNIFIED CTA

Book a workflow audit

05 SQUARE HANDOFF

Compose from a small set of parts

Consistency comes from relationships between tokens—not from multiplying components.

If a new asset cannot be explained using this grammar, it probably belongs to a campaign—not the core system.

Premium is a discipline of subtraction

Use the system to expose logic. Remove anything that performs sophistication without adding meaning.

DO

- Centre the core message when the page needs a decisive first impression.
- Use several quiet rails with varied signal timings.
- Brighten a square only when a route reaches it.
- Keep prose human, specific, and business-first.
- Use open space as an active design element.

DON'T

- Do not reintroduce orbits, circular nodes, or radial diagrams.
- Do not animate every surface or bind motion directly to scroll.
- Do not put every sentence inside a card.
- Do not use gold as a background default.
- Do not invent proof, metrics, clients, or outcomes.

Evolve without redesign theatre

Adopt the square-first system in order of visibility and reuse.

NOW

Hero, navigation, CTA geometry, type system, and colour tokens are the reference baseline.

NEXT

Replace legacy circular and orbital motifs when affected sections are naturally revised.

LATER

Extend the asset family to case studies, documents, social formats, and product surfaces.

GATE

Do not alter the official mark or formal print specifications without founder approval.

Source-aware by design

This kit separates implementation facts from direction and open decisions.

■ OBSERVED

Directly present in the current website source or established foundational book.

■ FOUNDER DIRECTION

Explicitly requested for the next visual-system phase: square-first, no circular supporting motifs.

■ RECOMMENDATION

A considered rule introduced here to make the current language repeatable.

■ UNKNOWN

Requires founder approval before being treated as a formal production standard.

Authority order: founder direction → current website implementation → foundational Brand Book → this operational interpretation.

Kramaniti

Strategy before tools. Systems before scale.
Communication after clarity.
